Computer Science Student | Aspiring

App and Software Developer

## SUMMARY

Being an undergrad at COMSATS University, I am self-driven and Blockchain enthusiast, eager to deepen my understandings and contribute to the exciting advancement in the Tech Industry. I am at present looking for a software development internship to use my abilities in creating products and learn from those already working in the industry.

## EDUCATION

**MATRICULATION AND INTERMETIDATE  
IQRA PUBLIC HIGH SCHOOL, AND IQRA COLLEGE  
2016-2018 AND 2018-2020**

**BS in Computer Science  
COMSATS University Islamabad, Lahore Campus  
Feb 2022 – Jan 2026  
CGPA: 2.81/4.00**

## SKILLS

Technical Skills:

- Programming Languages: C, Python, Java (OOP)
- Web Development: HTML5, CSS3, JavaScript, React.js, Bootstrap(basic)
- Databases: MySQL, Firebase (Realtime DB)
- Mobile App Development: Android Studio, VScode, UI Design, Firebase Integration, Real-Time Sync
- Computer Science Concepts: Data Structures & Algorithms, OOP
- Tools & Platforms: Git, GitHub, VS Code
- Automation & Emerging Tech: Prompt Engineering, AI Tools, YouTube Automation

Additional Skills:

- Data Manipulation using Python
- Scrum Board Management (Dework)

## CERTIFICATIONS

- Actively seeking certifications in Smart Contract and Web Development
- Required Internship for the capstone certification projects

## ACADEMIC PROJECTS

### WEB3 Project Management Tool (In Progress)

- Built a responsive, interactive Kanban board UI enabling seamless task creation, assignment, and progress tracking.
- Implemented AI-powered features for task time estimation, pricing prediction, and productivity analytics.
- Implemented real-time database sync and user profile management using wallet connection

### Web and Mobile App Development Projects

- Developing WEB3 Project Management tool with some AI integrations as part of our FYP.
- Integrated real-time database using Firebase for real-time task creation and management sync.
- Focused on scalability and a modular architecture supporting EVM chains and IPFS storage.
- Developed an EVM based wallet manager for managing the onchain payments like checking wallet balance and sending tokens using Infura API keys

### Airbnb + PakWheels clone

- Created a responsive UI clone using HTML, CSS, Bootstrap, and JavaScript.
- Demonstrated frontend design, layout structuring, and cross-device responsiveness.

### Portfolio Management Tool

- Built a portfolio management system using PHP, MySQL, and XML.
- Implemented full CRUD operations and structured database connectivity.
